

- Rollercoaster at Alton Towers theme park in Staffordshire, UK

- In June 2015 site engineers were fixing a fault on the ride and sent a car around the track to test it was working

- At the same time, ride operators added a new car to help clear the queue

- Only one of these cars made it back to the start, the other got stuck

- A safety system was in place to detect this but the engineers overruled it

- The resulting cash injured 16 people, two of whom needed both legs amputated
