PYRITE STANDARDS

- Often gold standards aren't as 'gold' as they seem
 - ▶ They are more like 'pyrite' standards (some call this alloyed-gold)
- In medicine it is difficult/costly to obtain autopsy results
- The fall-back is humans are required to provide the gold standard, but they are prone to error
- Sometimes gold standards are only known for one classification type
- Sometimes there is no true gold standard

GIANT-CELL ARTERITIS
