

Privacy

Three types for reidentification attacks:

1.Paperzi Attack-Hacker variant to find information about an individual

2. Domainlist Attack- Hackers want to find information about someone

3. Marketing Attack - Want population, not both here and accuracy

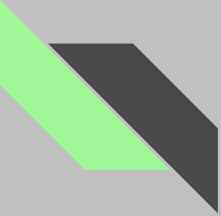

# Privacy

Three types for reidentification attacks:

1. Paparazzi Attack - Hackers want to find information about an individual
2. Journalist Attack - Hackers want to find information about someone
3. Marketing Attack - Want populations, not too bothered about accuracy
