

The output doesn't matter to the
algorithm but it clearly matters
to people

A decorative diagonal band runs from the top-left corner towards the bottom-right. It features a bright green triangle at the top-left, followed by a dark gray section, and then a patterned area. The patterned area is split vertically: the left side shows a white circuit board pattern on a dark gray background, and the right side shows a white organic, flame-like pattern on a dark gray background.

Thank you
