

Algorithm Appreciation

- People trust decisions more when they believe the decision was made by a algorithm

• People want to do things authentically

There is an Irony of Automation

- Danger of treating algorithms as though they are  
*epistemic superiors*

# Algorithm Appreciation

- People trust decisions more when they believe the decision was made by a algorithm
- People want to do things algorithmically
- There is an *Irony of Automation*
- Danger of treating algorithms as though they are *epistemic superiors*
