

SIMULATIONS

SIMULATIONS

- 1. Start with test and pyrite standard results
- 2. Gild the pyrite-test confusion matrix and get gilded test statistics
- 3. Ask "God" for the gold standard results given a set value for ϕ
- 4. Calculate the gold standard confusion matrix and test statistics
- 5. Repeat steps 3 & 4 many times to check performance
- 6. Compare gold v gilded results

RESULTS
